

Abdallah Samir Elsayed Esmaeel

Software Engineer | Java, Spring Boot, React , Microservices

 abdallahsameer22@gmail.com  +20 109 745 6260  Cairo, Egypt

 LinkedIn  Github  HackerRank

PROFILE

A Software Engineer experienced in designing and developing scalable **microservices** using **Java, Kotlin, Spring Boot, Kafka, React** and **Kubernetes**. Skilled in building reliable **distributed systems**, solving complex technical challenges, and delivering high-quality software. Experienced in delivering solutions for healthcare and construction domains, while leveraging AI-powered technologies and modern cloud-native architectures.

PROFESSIONAL EXPERIENCE

Software Engineer(Java, Kotlin), (Squadio) - Whitehelmet  2025/03 – now

Industry: Construction Tech | Smart Building Automation

Developing advanced automation solutions for the construction industry, focusing on High traffic, Scalability and Performance.

- Designing and implementing backend services using **Java, Kotlin**, and **Spring Boot, Keycloak** for **OIDC** and **OAuth2** ensuring scalability and high-performance and scalable systems.
- Working closely with the cross-functional teams (DevOps, QA, Product Owners) to deliver reliable and secure software in an Agile environment.
- Involved in requirements gathering and solution design, implementing the solution using standard protocols and applying best practices patterns to ensure consistency, availability, maintainability.

Software Developer, Santecture  2024 – 2025

Driven by the market challenges and need for a smart revenue cycle management solutions in the fast-paced digitized healthcare sector, established a constructive revenue cycle management in both the private & public healthcare sectors across the GCC.

- Handling API Rate Limit, Handle Authentication, Authorization on the application level using token based auth.

- Designed and maintained microservices handling high-volume healthcare transactions.
- Owned the full SDLC lifecycle from requirements gathering and solution design through implementation, testing, deployment, and client support.

Software Engineer (JVM languages), Coral Technology

2022 – 2024

Coral is the cutting-edge platform for healthcare in US that serve customers in the healthcare field.

- Implementing epics, features, tasks conducted from the product & business team.
- Improved code quality through automated testing and code reviews.
- Applying the clean code standard, implementing high performance approaches to meet the expectations of services.
- Reduced API response time by 30% through query optimization and caching strategies.
- Develop RESTful APIs, Socket programming, Cron Jobs to handle different paradigms to meet the business.

SKILLS

Languages

- Java with LTS support(8, 11, 17, 21).
- Kotlin
- Javascript, Python, Typescript

Architecture

- Distributed Systems using Microservices
- Event-Driven Architecture
- Design Patterns, SOLID Principles
- Service Oriented Architecture(SOA)

Databases

- PostgreSQL, SQL Server, Oracle
- MongoDB, Redis

Tools & AI Models

- Encoders, IntelliJ, API DOG, VSCode.
- GPT-5.5, Claude (Opus 4.8, Sonnet 4.6).

Frameworks

- Spring Boot, Quarkus, Vert.x
- Spring Security, OAuth2, OIDC
- Spring Data JPA(Hibernate), Java EE
- React JS, Redux, Bootstrap 5
- JUnit 5, Mockito, Integration Testing

Messaging & Streaming

- Apache Kafka
- RabbitMQ
- Redis

Cloud & Devops & CI/CD Tools

- Docker, Kubernetes
- AWS, GCP, OCI
- Linux, Windows
- Jenkins, GitHub Actions, GitLab CI
- Git with Github, Gitlab, Bitbucket

EDUCATION

Enterprise & Web Applications Development (Java) 9-Month Professional Training Program (ITI), *ITI*

2021 – 2022
Giza, Egypt

Become an **effective** developer for the development process and professional architecture with the new technologies to serve the market needs.

Skills:

- Restful APIs, Web Services, SQL Like Postgresql & No-SQL like MongoDB & Redis for caching.
- Jakarta EE, Spring, Spring boot, Spring data JPA, Keycloak, Security, JWT.
- Front End Technologies (**Html5, JS, React JS, Redux, React Router**).
- Unit Testing using Junit, Mockito, Postman for API testing, AWS EC2, S3, AWS Lambda functions.
- Maven, Gradle, Multithreading & Concurrency, Data formats like Json, yaml, XML, API Design & Documentation with OpenAPI (Swagger).
- Learning Communication, Teamwork, Interpersonal Skills.

Faculty of Computer Science and Information Technology Benha University, *BFCI*

2014 – 2018
Benha, Egypt

Bachelor's degree, Computer Science and Information Systems.

Graduation Project

- An E-commerce application uses NLP to process text comments on products and apply the reviews automatically without human intervention.

CERTIFICATES

Oracle Certified Professional: Java SE 17 Developer  — Oracle
